ENVIRONMENTAL PERFORMANCE		
		Material topics were identified based on the significant aspects derived from the environmental management system.
Management approach: materials		
301-1	Materials used by weight or volume	Page 83 The weight of reactive consumption is provided as representative.
301-2	Recycled input materials used	Given the nature of Aqualia's business, captured or purchased water is considered to be a renewable source. Comparatively, other types of consumptions are insignificant 67-69.
Management approach: products and services		
301-3	Reclaimed products and their packaging materials	Not applicable
Management approach: energy		
302-1	Energy consumption within the organisation	Pages 82-84 Total energy consumption: 3,700,757 GJ (indirect consumption+direct renewable consumption+fuel consumption) Given that the electricity mix is unavailable for all the countries in which the organisation operates, the provided indirect consumption figure does not differentiate between renewable and non-renewable energy consumptions. No data on energy sold are available.

302-2	Energy consumption outside the organisation	Information unavailable.
302-3	Energy intensity	469.82 GJ/employee
302-4	Reduction of energy consumption	Pages 83-89 In each contract, Aqualia works on actions to reduce energy consumption for the management system based on ISO 50001. However, the overall 2017 figures for reduction of energy consumption are unavailable. Moreover, the company develops Research, Development and Innovation (RD&I) projects to reduce energy consumption. (refer to Pages 74-78 and Page 89)
302-5	Reduction in energy requirements of products and services	Pages 82-85 Pages 74-78 and Page 89 (RD&I Projects)
302-6	Confirmed incidents of corruption and actions taken.	There were no corruption cases or lawsuits.
Management approach: water		
303-1	Water withdrawal by source.	Pages 86-87
303-2	Water sources significantly affected by withdrawal of water	Pages 86-87 Aqualia captures water through administrative concessions in which the competent water management authority decides on the capture point and quantities. For this reason, Aqualia does not manage information on capture percentages regarding total water masses.
303-3	Water recycled and reused	Given the nature of the Aqualia business, water is neither recycled nor intended for internal use of the organization. Instead the water is discharged and used by third parties (refer to indicator 306-1)
Management approach: biodiversity		
304-1	Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas	125 of 6,215 in Spain 2 of 172 in Italy 0 of 383 in Portugal 0 of 1 in Egypt 0 of 84 in the United Arab Emirates 0 of 1 in Mexico
